

## **STRIKE CALL**

**September 13<sup>th</sup> 2019**

### **Employers do not want to share fairly!**

The companies are doing very well. High profits are being made and the order portfolios are fuller than full. You would think that employers would do everything in their power to retain people for their sector. But employers opt for actions/strikes and unrest instead of a decent collective labour agreement that makes the sector more attractive.

Even the extra added, fifth negotiating round has not resulted in a collective labour agreement. After a long talk we are still empty-handed! Then, unfortunately, only one thing remains and that is taking action for a good Metal & Technology CLA.

Stand up for your right as an employee! Only by standing shoulder to shoulder, there will be a decent collective agreement for the Metal en Technology industry. Ask each colleague to join this "24-hour strike".

### **We call on workers to strike on Friday 13<sup>th</sup> September 2019 for a decent Collective Labor Agreement Metal & Technology industry! (Metaal & Techniek)**

**What:** 24-hour strike  
**When:** Friday 13th September 2019  
**Where to register:** Alberdingk Thijmstraat 1 Eindhoven (Wim van Doorne Muziekiosk)  
**Registration strikers:** from 09. until 12:30 hour

#### **Right to strike**

In the Netherlands, employees have the right to strike. This is not without reason! We have already informed all employers that we call on their employees to strike. It is not necessary for you to report to your supervisor that you are going on a strike but if you want to it is allowed of course.

#### **Together for a good CLA!**

Kind regards,  
The Trade Union Officials of CNV VAKMENSEN

#### **Please note!**

**Do not forget to bring your CNV VAKMENSEN membership card AND your bank card! This is to ensure that the registration and payment of the strike payment goes well and quickly !!!**
